

## E-1048-700 Solid State Remote Power Controller

### New Plug-in Type to fit 17plus Module

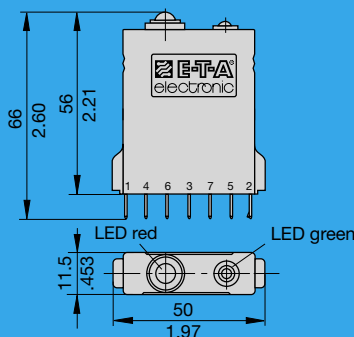

#### IDEALLY SUITED FOR:

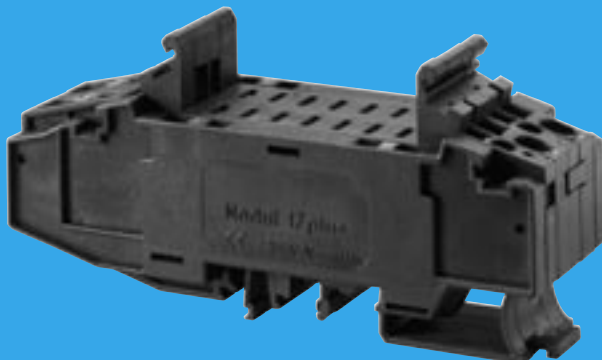

- Power distribution systems
- Process control applications
- Continuous flow
- Din rail mounting available

#### FEATURES:

- The ability to have current amplification of individual PLC outputs without change of output cards
- Protection of the PLC outputs against overload and short circuit conditions
- Wire breakage monitoring of load and line
- Electrical signalling and visual fault indication
- Remote control
- Physically isolated fault indication
- Fast short-circuit limitation and disconnection
- Available as a modular system in combination with module 17 plus socket system
- The 17 plus offers integral pre-wiring of common supply and signal contacts
- Plug-in busbar
- Electrical connection by means of screwless spring-loaded terminals

#### 17PLUS MODULE
