

Description

The Economy **Power-D-Box®** is a compact 2RU power distribution system (2 rack units). The redundantly designed system accommodates 8335 or 8340-F magnetic or hydraulic-magnetic plug-in type circuit breakers. The busbars as well as the group signalisation are insulated in a moulded enclosure, so that live parts cannot be touched. Connection of loads is from the front via blade terminals which are protected against reverse polarity. Besides various preferred types, we can offer individual solutions, perfectly tailored to your application.

Economy Power-D-Box®

Features

- 19" power distribution system, made of aluminium
- Voltage rating DC 48 V, 65 V, 80 V
- Minus pole protected
- Optional power distribution systems (X8340-S02, X8340-S04, X8340-SZ4)
- Total current depending on integral power distribution system up to 80 A per supply.
- Load as per integral power distribution system up to 30 A per circuit breaker.
- Integral cable grip rail
- Optional accessories: load output connectors protected against reverse polarity, extracting tool, blind cover
- Application-specific assembly options, e.g. back-up fuse, separate circuits, redundant and non-redundant circuits etc. upon request

Your benefits

- Compact and service-friendly design
- Easy mounting in 19" and ETSI system cabinets by means of reversible flanges
- Reliable alarm management by means of group signalling
- Ease of system extension during operation thanks to plug-in type circuit protectors
- Redundant power supply ensures unrivalled system uptime

Preferred types – for more details on all configurations please see order numbering code

Preferred types are E-T-A products most frequently used by E-T-A customers. We manufacture E-T-A preferred types in particularly high volumes. Our preferred types are supplied at shorter lead times than non-standard versions.

Preferred types	Short description
PDB-N-S2 12	Load current max. 132 A with 2 x 6 front-side load terminals
PDB-N-S2 16	Load current max. 132 A with 2 x 8 front-side load terminals
PDB-N-S4 08	Load current max. 160 A with 2 x 4 front-side load terminals
PDB-N-SZ 08	Load current max. 125 A with 2 x 4 front-side load terminals
PDB-N-SZ -16	Load current max. 150 A with 2 x 5 front-side load terminals

Technical data

19" Power-D-Box®	length: 84 modules (426.72 mm) height: 2 U (88.90 mm) material: aluminium
Rated voltage	DC 48 V; DC 65 V; DC 80 V
Fire resistance (IEC 60695, Part 2-2)	self-extinguishing

Details of power distribution system:

X8340-S02	
Load	25 A per position (30 A upon request) 132 A for complete unit
Terminal design	
Supply feed (terminal block)	screw-terminal 6...50 mm ² , multistrand, supply 6...35 mm ² with wire end ferrule additional blade terminals DIN 46244-A6,3x0,8
Load (module)	blade terminals 6.3x0.8 load output terminal protected against reverse polarity front
Signalling (module)	blade terminals DIN 46244-A4.8x0.8mm
X8340-S04	
Load	20 A per position 80 A per module

Technical data

Terminal design	
Supply feed	screw terminal supply 6...25 mm ² multistrand, 6...16 mm ² with wire end ferrule
Load and signalling	screw-less terminal 0.5...2.5 mm ² , multistrand, with wire end ferrule, on the front side
X8340-SZ4	
Load	25 A per position (30 A upon request) 150 A for the distribution system
Terminal design	
Supply feed	copper busbar 10 x 3 mm with hole ø 5.3 mm current supply from the rear side
Loads	blade terminals 6.3 x 0.8 mm, load output terminal protected against reverse polarity on front and rear side
Signalling	signalisation 6.3 x 0.8 mm plug-in direction as circuit breakers, opposite the main terminal side

Preferred types

Preferred types are E-T-A products most frequently used by E-T-A customers. We manufacture E-T-A preferred types in particularly high volumes. Our preferred types are supplied at shorter lead times than non-standard versions.

Preferred types	Short description
PDB-N-S2 12	Load current max. 132 A with 2 x 6 front-side load terminals
PDB-N-S2 16	Load current max. 132 A with 2 x 8 front-side load terminals
PDB-N-S4 08	Load current max. 160 A with 2 x 4 front-side load terminals
PDB-N-SZ 08	Load current max. 125 A with 2 x 4 front-side load terminals
PDB-N-SZ -16	Load current max. 150 A with 2 x 5 front-side load terminals
